Volunteer Lake Monitoring Program 2010 Season in Review & 2011 Season Scope

Website: www.epa.state.il.us/water/vlmp

#### 2010 Coordination Team

 Holly Hudson with CMAP
 Mike Adam & Kelly Deem with LCHD
 Rob Clodi with GERPDC
 Teri Holland, Katie Davenport & Greg Ratliff with Illinois EPA

Online Database Support – Jeremy Morgan

# 2010 VLMP

#### > Reduced to Tier I activities:

- Funding Issues,
- Illinois EPA's Statewide Coordinator took a new job, &
- Adding On-line Database Secchi Form entry.
- > Special Projects (Tier III) in support of:
  - Clean Lakes Program Projects &
  - 319 Projects

# **VLMP** Overview

#### > Tier I Includes:

- Secchi Monitoring 3 lake locations (typically),
- Weather Observations,
- Lake Management Activities & Observations,
- Exotic Animal & Plant tracking activities,
- Secchi Form completion, &
- Online Database Entry.

### 2010 VLMP Overview

#### > Special Projects (Tier III-like) includes:

- Tier I activities,
- Water Quality Sampling (nutrients/chloride),
- Dissolved Oxygen/Temperature Profiles,
- Chlorophyll Sampling & Filtering, &
- Limited plankton identification sampling.

#### **Online Database Entry**

#### Home

Since 1981, citizen volunteers, the Illinois EPA, and area-wide planning commisions have been working to monitor the quality of Illinois" lakes through the Illinois Volunteer Lake Monitoring Program (VLMP). This cooperative effort provides information on many more lakes than could be otherwise monitored by the state agency staff. The volunteers have learned much about their lakes, and a substantial database has been established from information they have collected. The data is routinely used by lake scientists, planners, consultants, and the volunteers for a wide variety of purposes.

Browser Requirements: The following are requirements needed for using the VLMP Web Application

Internet Explorer 6, 7, 8 Javascript Enabled. Allow Popups from this Site. (\*this is not for advertisement purposes but for informational reminder messages.) Recommended Screen Resolution of 1024 by 768 or higher.

\*To change or check any of the browser settings above, please refer to your browser's documentation or deskop display settings.

If you are using Internet Explorer v8 and are having issues with the above Get Started Menu you may Click Here to see how to toggle compatibility mode.

#### **Results and Discussion**

# Basic Monitoring Program Participating Lakes Volunteer Participation Transparency Ranking Oligotrophic to Hypereutrophic Aquatic Invasive Species Tracking

### **Results and Discussion**

#### > Expanded Monitoring Program

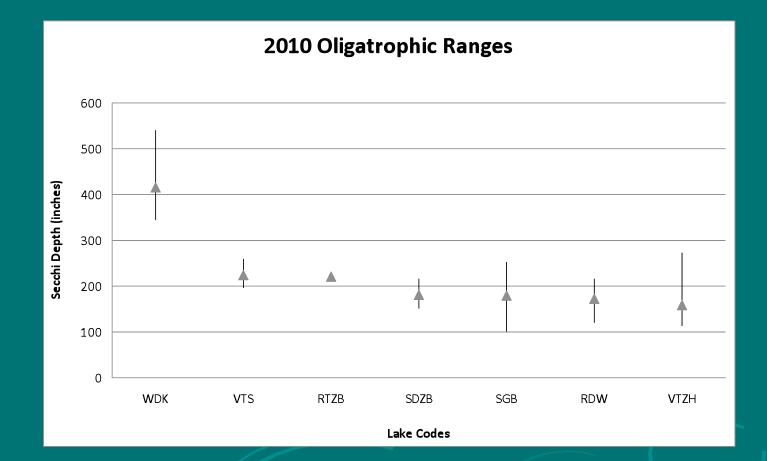

- Water Quality Monitoring
  - Suspended Soils
  - Nutrients
    - Nitrate and Nitrite
    - Ammonia
    - Total Phosphorus
  - Chlorophyll

Dissolved Oxygen/Temperature
 Trophic State Index (TSI)
 Transparency Variability

## Transparency Ranges using Carson TSI Ranges

- > 125 Lakes were sampled 4 or more times
  - 7 Oligotrophic
  - 20 Mesotrophic
  - 83 Eutrophic
  - 15 Hypereutrophic

#### **Email Distribution List**

Sign up to be on our distribution list and receive our (Semi-) Quarterly Newsletter and Annual Report (or notification of release and download location).

- Current Volunteers will automatically be on distribution list.
- Emails are not given out or sold.

### 2011 Season

Tier I (Goal 170-180)
Tier II (50 lakes maximum)
Tier III (None)
Dissolved Oxygen/Temperature (30 max)
